ABOUT ME

Dynamic JavaScript Full Stack Developer with multiple years of proven success in creating and maintaining innovative software solutions. Extensive experience in front-end and back-end technologies. Excels in collaborating with cross-functional teams to meet project goals. Currently leading a popular Georgian paraphrasing and summarizing tool at a successful startup. Committed to excellence in code quality, system performance, and user experience.

SKILLS

- **Front End Development** | HTML, CSS, JavaScript, React, Tailwind, Shadcn
- **Back End Development** | Java, Node.js, Vert.x, Express.js
- **Miscellaneous** | Firebase, MongoDB, Amazon AWS, GIT, Stripe
- **Soft Skills** | Delivering results, Team player, Self-learning, Problem-solving

PROFESSIONAL EXPERIENCE

Gadawere.ge - Founder

- Founded and conceptualized gadawere.ge, the first Georgian paraphrasing tool, leveraging my innovative thinking and entrepreneurial spirit to identify the need for such a tool in the market effectively.
- Acted as the sole developer, responsible for designing and implementing the entire platform, utilizing various services like Stripe for payment processing, AWS for cloud infrastructure, and Firebase for database management.
- The platform gained remarkable traction, attracting over 10,000 users within the first month of deployment, enabling users to easily paraphrase texts with high accuracy, leading to increase productivity and efficiency in content creation and academic writing.

Freelance Development

- Engineered a parking management app for a local company, streamlining the parking process and enhancing user convenience, resulting in increased efficiency and customer satisfaction.
- Developed a delivery helper app for a pet food company, optimizing delivery routes and improving tracking capabilities, leading to improved delivery efficiency and reduced costs.
